SECTION 1 LITTLE LONDON

1. PART 1 – OVERVIEW

1.1 INTRODUCTION

1.1.1 This section of the Output Specification sets out the City Council's specific requirements regarding the scope of works for the Little London PFI area, in addition to the core requirements set out in the main Output Specification document (Schedule 2, Volume 1). The following section of this document describes the City Council's requirements in relation to the Demolition Properties, of the New Build Dwellings, of the Environmental Works, and of the Refurbishment Works and conversion works over the next 20 years through the Private Finance Initiative.

1.1.2 The New Build Dwellings will part replace existing City Council owned Dwellings which have been identified for demolition.

1.2 PROJECT OBJECTIVES

1.2.1 In Little London, there are additional specific objectives:

1.2.1.1 To create a vibrant and accessible neighbourhood.

1.2.1.2 To improve connections with the city centre.

1.2.1.3 To enhance the distinctiveness of Little London with the addition of landmark contemporary housing, which effectively links the city centre to other suburbs.

1.3 SCOPE

1.3.1 Refurbishment of 848 City Council Properties and common parts to 41 Leasehold dwellings.

1.3.2 Demolition of 16 City Council bed sits.

1.3.3 Construction of 113 new City Council Dwellings 78 x 2 bedroom Dwellings, 20 x 3 bedroom homes and 15 x 4 bedroom homes.

1.3.4 Repairs and maintenance service for New Build Dwellings and refurbished properties for a period of 20 years.

1.3.5 Environmental improvements, including fencing and gating off of alleyways below 6 first floor flats.

1.3.6 Demolition of up to 85 garages and 2 linked sub-stations as part of the estate environmental works to create more parking spaces, improve the environment and refurbishment of 80 garages and 3 linked sub-stations.

2. PART 2 – WORKS

2.1. DEMOLITION

2.1.1 Within the scope of this Agreement the Contractor will be required to undertake the selective demolition of 16 Dwellings and up to 85 garages within the estate and existing community facilities consisting off:

2.1.1.1 16 bed-sit homes which are situated over ginnels and making good to adjacent properties;

2.1.1.2 85 garages are in blocks within low rise housing;

2.2. NEW DWELLINGS

2.1.2 Within the scope of this Project, the Contractor will be responsible for the design and build of 113 new City Council Dwellings on the Carlton Gate Site.

Dwelling Type	Number
2 bed flats	68
2 bed houses	10
3 bed houses	20
4 bed houses	15

2.1.3 The arrangement of New Build Dwellings on Carlton Gate should not preclude further development of the site at a later stage.

2.1.4 The works to Dwellings shall include for all works within the curtilage of the Dwellings.

2.3. ENVIRONMENTAL WORKS

2.1.5 In preparing and drawing up its proposals, the Contractor shall take full account of the Little London Development Framework and ensure that the principles and requirements within this Framework document are reflected in proposals for environmental works.

2.1.6 The existing neighbourhoods within which the Contractor will be responsible for the design and construction of environmental works are identified individually by name within the Development Framework (and in scope of works detailed below).

- 2.1.7 Environmental works will be required to compliment New Build Dwellings constructed on part of Carlton Gate.
- 2.1.8 The principle of a green route with passing through the Carlton Gate site and around the Central Hub and beyond to Cambridge Road will continue to apply.
- 2.1.9 The Environmental Works shall include all of the works to the project areas outside of the curtilage of the buildings and house gardens.
- 2.1.10 Little London is made up of a series of distinct areas which have their own characteristics and a brief description of the Environmental Works required in each area is as follows.

Carlton's 2

- 2.1.11 This neighbourhood includes three tower blocks (one of which is sheltered accommodation), maisonette blocks and low rise homes which will be refurbished. This neighbourhood sits adjacent to the main Carlton Gate new build site. The main vehicular route into the neighbourhood also forms a major pedestrian spine linking into the central hub. The main features of the environmental improvements to this neighbourhood include:
 - 2.1.11.1 Improved parking through the creation of parking bays separated by street trees along the main route;
 - 2.1.11.2 Semi private parking and private fenced garden areas will be created at the base of each tower block;
 - 2.1.11.3 Re surface existing car parks and footpaths;
 - 2.1.11.4 A pocket park will be created;
 - 2.1.11.5 Refuse collection solutions for those homes with limited vehicular access and also affected by changes in level;
 - 2.1.11.6 Shrub and tree planting.

Carlton's 1

- 2.1.12 A low rise neighbourhood with particularly impressive topography which prevents vehicular access to some properties. This area is populated by family homes and low rise flats. There are some bed-sits over alleyways which attract nuisance behaviour and garage blocks and walls prevent natural surveillance. Demolition of bed-sits and garages, and provision of alley way and courtyard gating will improve legibility throughout the neighbourhood. Environmental improvements include:

- 2.1.12.1 High quality semi private courtyard improvement;
- 2.1.12.2 Improvement in kerbside waste collection and recycling facilities particularly for those properties affected by changes in levels and poor access.
- 2.1.12.3 New surfaces to footpaths and courtyards;
- 2.1.12.4 Alleyway and courtyard closures/gating;
- 2.1.12.5 Tree and shrub planting;
- 2.1.12.6 New car parking areas;
- 2.1.12.7 Refuse collection solutions;
- 2.1.12.8 Improvement of Leicester Place green space.

Servias

2.1.13 A similar mix of property types to Carlton's 2 but with a more level topography. Parking areas will be created through selective demolition of garages. Over alleyway bedsits will also be removed through demolition. The final segment of the green pedestrian and cycle route through Little London runs through the Servias. Environmental improvements include:

- 2.1.13.1 High quality semi private courtyard improvement;
- 2.1.13.2 New surfaces to footpaths and courtyards;
- 2.1.13.3 Alleyway and courtyard closures/gating;
- 2.1.13.4 Tree and shrub planting;
- 2.1.13.5 New car parking areas.

Oatlands 1

2.1.14 An improved pedestrian route to the central hub should be established through this neighbourhood of houses and low rise flats. Environmental improvements include:

2.1.14.1 High quality semi private courtyard improvement;

2.1.14.2 New surfaces to footpaths and courtyards;

2.1.14.3 Alleyway and courtyard closures/gating;

2.1.14.4 Gating of alleyway under flat as identified in Volume 2, Annex 6;

2.1.14.5 Tree and shrub planting;

2.1.14.6 New car parking areas.

Oatlands 2

- 2.1.15 Oatlands 2 comprises a low rise development of flats and houses, the three high rise Oatland blocks and, an area of green space earmarked for an informal play space for 8-13 year olds. Refer to the latest government guidance to creating successful play spaces detailed in the mandatory guidance in Annex 4.
- 2.1.16 Similar problems arise from the Radburn layout in the low rise area which will be addressed by alley gating of footpaths and gating access to passages below first floor flats. Environmental improvements include:
- 2.1.16.1 High quality semi private courtyard improvement in the low rise neighbourhood;
 - 2.1.16.2 New surfaces to footpaths and courtyards;
 - 2.1.16.3 Alleyway and courtyard closure/gating;
 - 2.1.16.4 Gating alleyways under 5 no. flats as identified in Volume 2, Annex 6;
 - 2.1.16.5 Tree and shrub planting;
 - 2.1.16.6 New car parking areas;
 - 2.1.16.7 Kerbside Refuse collection solutions;
 - 2.1.16.8 Semi private parking and fenced garden areas will be created at the base of each tower block.
- 2.1.17 The high rise blocks sit in an area of topographically challenging underused green space with car parks and garage blocks at the base. The refuse in the blocks is currently collected via refuse chutes from a bin room in the base of the blocks. The current collection system needs improvement to address issues of high maintenance and odour and encourage waste recycling. Environmental improvements will include:
- 2.1.17.1 Fenced private garden space around the three blocks;
 - 2.1.17.2 Semi private car parking space;
 - 2.1.17.3 Resurfaced tarmac areas and paths.
- 2.1.18 The Development Framework indicates the provision of an informal 8 – 13 year olds play area in an area adjacent to the high rise. The Contractor is required to move away from a stereotypical approach where a playground consists of basic equipment, fencing and safety surfacing which caters for a narrow range of play experiences. Previous concentration on a large ball games area should be set aside and replaced by a far wider range of play activities which compliment the surrounding area. The aim is to improve the quality of play opportunities for this age group through creative play settings that help stimulate the senses and encourage greater use of the imagination. Children should be offered a rich play environment and an experience of the natural environment in an urban setting.

Lovell's

2.1.19 A later development of low rise houses in an area with a number of social landlords. Only the low rise council homes and sheltered accommodation will be improved through the Project and Environmental Works are minimal. Environmental improvements include:

2.1.19.1 Tree planting;

2.1.19.2 Fencing to sheltered accommodation.

New Build Sites

2.1.20 On New Build Sites, specific works should be undertaken to improve the interface between existing neighbourhoods and new development.

2.1.20.1 The new pedestrian green route and public square illustrated in the development framework should be included within environmental works for Carlton Gate.

2.1.20.2 Access to the subway should be maintained and improved.

2.1.20.3 Environmental improvements around the perimeter of the Central Hub site should include the continuation of the green route (including pedestrian crossing on Lovell Park Road).

2.4. CONVERSIONS

2.1.21 Not used.

2.5. Not used

2.1.22 Not used

2.6. REFURBISHMENT

2.1.23 The Contractor will be required to refurbish 848 Dwellings, with works to the common parts of 41 leasehold properties.

2.1.24 Comprising of 425 flats in high rise blocks, 180 flats in low and medium rise blocks and 243 houses. Of the 41 leasehold, 11 are within high rise blocks and the remainder within low rise flats and maisonettes.

2.1.25 As part of the external refurbishment of the retained Little London blocks, the contractor shall include the removal of any redundant or unauthorised television or telecoms equipment as necessary.

Responsibilities

2.1.26 In undertaking the programme of Works, the Contractor shall:

2.1.26.1 Comply with the requirements of the Project Agreement;

2.1.26.2 Complete the Works within a period of 5 years from Service Commencement;

2.1.26.3 Comply with all other requirements under this Agreement;

2.1.26.4 Satisfy the criteria within the Certification Standard (Refurbishment) and Certification Standard (Conversions) as the case may be;

2.1.26.5 Refurbish the Dwellings and undertake the Works required ensuring that the properties achieve the Full Availability Standard, as set out in Annex 10, volume 1.

SECTION 2 BEESTON HILL AND HOLBECK70

3. PART 1 – OVERVIEW

3.1.INTRODUCTION

- 3.1.1 This section of the Output Specification sets out the City Council's specific requirements regarding the scope of works for the Beeston Hill and Holbeck PFI area, in addition to the core requirements set out in the main Output Specification document (Schedule 2, Volume 1). The following sections of this document describes the City Council's requirements in relation to the Dwellings to be demolished the new Dwellings, environmental works, and the refurbishment and conversion works.
- 3.1.2 The new City Council Dwellings will part replace existing City Council owned Dwellings which have been identified for demolition.

3.2.PROJECT OBJECTIVES

- 3.2.1 In Beeston Hill & Holbeck, there are additional specific objectives:
- 3.2.1.1 To support the development of a cohesive community through improvements in housing, environmental design and connectivity.
 - 3.2.1.2 Take advantage of Holbeck's location as a gateway to the city centre and the adjoining Urban Village.
 - 3.2.1.3 To meet the aspirations of the community by providing more family housing.
 - 3.2.1.4 To contribute to the wider regeneration framework for Beeston Hill & Holbeck.

3.3. SCOPE

- 3.3.1 Refurbishment of 373 City Council properties, 1 sheltered housing community building and common parts to 10 leasehold properties.
- 3.3.2 Demolition of 198 City Council properties and 1 shop.
- 3.3.3 Conversion of a sheltered housing scheme with some 30 bed-sits/flats and 1 wardens flat into 23 fully self contained flats and ongoing maintenance during the contract period.
- 3.3.4 Construction of 275 new Council homes (155 x 2 bed Dwellings, 80 x 3 bed, 30 x 4 bed and 10 x 5 bed homes).
- 3.3.5 Repairs and maintenance service for new Council homes and refurbished properties for a period of 20 years.
- 3.3.6 Environmental improvements.
- 3.3.7 Demolition of 40 garages.
- 3.3.8 Not Used.

4. PART 2 – WORKS

4.1. DEMOLITION

- 4.1.1 Within the scope of this Agreement the Contractor will be required to undertake the selective demolition of Dwellings, a retail unit and garages, consisting of:
 - 4.1.1.1 1 retail unit;
 - 4.1.1.2 158 low-rise flats and maisonettes;
 - 4.1.1.3 40 cottage style flats;
 - 4.1.1.4 40 garages on three sites

4.2. NEW DWELLINGS

- 4.2.1 Within the scope of this Project, the Contractor will be responsible for the design and build of 275 New Build Dwellings:

Dwelling Type	Number
2 bed flats	126
2 bed houses	29
3 bed houses	80
4 bed houses	30
5 bed houses	10

4.3. ENVIRONMENTAL WORKS

- 4.3.1 In preparing and drawing up its proposals, the Contractor shall take full account of the environmental improvements for the Meynells Neighbourhood suggested by the Strategic Design Alliance (previously made available within the vroom) and the Holbeck and Beeston Regeneration Plan.
- 4.3.2 The areas within which the Contractor will be responsible for the design and construction of the environmental works are defined as the Meynells Neighbourhood and the Ingrams Neighbourhood the boundaries of which are included in Plan LCCFC BHH4 – v3 appended to this Output Specification.
- 4.3.3 The expected environmental works for Beeston Hill & Holbeck can be summarised into distinct areas as follows:

Meynells

- 4.3.4 Beyond the Holbeck Towers new build site lies Holbeck Moor, which offers substantial green and recreational space for the area. The environmental works to the low rise neighbourhood aim to address the ambiguity presented by the radburn layout, increase car parking and improve legibility through the enhancement of a major pedestrian route linking into the green corridor, which connects Holbeck Moor and adjacent areas to the City Centre. The City Council is currently investing in improvement works to enhance a walking route via Sweet Street. The environmental works will also seek to discourage nuisance by preventing access by motorcycles to pedestrian routes through the estate and by the closure of other alleyways to create semi private spaces. It is important that the quality of environmental works on the new build site is continued through into the existing neighbourhood to create a seamless transition. The Meynell Heights block will be retained and refurbished. Works required include the following:
- 4.3.4.1 The primary pedestrian footpath (which will continue through from the new build site) will be resurfaced with a material which distinguishes it from secondary routes;
 - 4.3.4.2 Installation of bike restriction barriers;
 - 4.3.4.3 Resurfacing of neighbourhood footpaths and car parks which are unadopted;
 - 4.3.4.4 Improving lighting where necessary (in liaison with Street Lighting PFI Contractor);
 - 4.3.4.5 The alley gating of some footpaths;
 - 4.3.4.6 The provision of additional garden fencing to City Council Homes and the treatment of unsightly back garden boundary treatments;
 - 4.3.4.7 A soft landscaping scheme will be applied to the shared gardens of low rise flats;
 - 4.3.4.8 Improvements to areas of semi private green space including fencing and planting, plus the planting of additional street trees;
 - 4.3.4.9 New car parking bays will be created to allow residents to park nearer to their home;
 - 4.3.4.10 Private gardens will be created at the base of Meynell Heights along with increased access to car parking spaces.

Ingrams

4.3.5 This neighbourhood of low rise flats and houses and older person's bungalows is bisected by Domestic Street. The neighbourhood also contains the Ingram Court Sheltered Complex. The environment in this neighbourhood is less problematical than the Meynells and although it does have rear alleyway access to gardens the alleyways only have one entrance and exit which make surveillance easier. Works required include the following:

4.3.5.1 Soft and hard landscaping improvement to Ingram Court with particular attention paid to seating and planting;

4.3.5.2 A soft landscaping scheme applied to the shared gardens of low rise flats;

4.3.5.3 A soft landscaping and tree planting scheme for the Balms that will improve its current bleak appearance.

New Build Sites

4.3.6 Where development sites are identified wholly or in the majority for the development of new Council homes, specific works should be undertaken to improve the interface between existing neighbourhoods and new development.

4.4. CONVERSIONS

4.4.1 The Contractor will be required to carry out conversion works on 30 Dwellings at Ingram Court to provide 23 fully self contained flats (including 3 wheelchair user standard 2 bedroom flats) in addition to refurbishing them to the same standard as the other refurbished properties.

4.4.2 The conversion works should include refurbishment works to the Warden's house within the Ingram Court complex.

4.4.3 Full details of the re-modelling requirements can be found in Annex 5, appendix 2.

4.5. REFURBISHMENT

4.5.1 The Contractor will be required to refurbish 373 Dwellings, plus the common parts to 10 leasehold properties and works to convert 30 properties and wardens flat referred to in 3.3.3 above.

4.5.2 Comprising of 95 flats in high rise blocks, 76 flats in low rise blocks, 25 bungalows and 177 houses, together with the 23 units to be created from the Ingram Court conversion. Of the 10 leaseholders 4 are in the high rise block.

4.5.3 The refurbishment of 20 garages.

4.5.4 The refurbishment of Ingram Gardens sheltered housing community facility.

Responsibilities

- 4.5.5 In undertaking the Refurbishment Works, the Contractor shall:
 - 4.5.5.1 Comply with the requirements of the Project Agreement;
 - 4.5.5.2 Complete the Works within a period of 5 years from Service Commencement;
 - 4.5.5.3 Comply with all other requirements under this Agreement;
 - 4.5.5.4 Satisfy the criteria within the Certification Standard (Refurbishment);
 - 4.5.5.5 Refurbish the Properties and undertake the Works required to ensure that the Properties achieve the Full Availability Standard, as set out in Annex 10, volume 1.

ANNEX 1: Properties to be Demolished

ANNEX 5, Appendix 2: Ingram Court Conversion

Ingram Court

The remodelling of Ingram Court will have all the following facilities and design features intended to enable older people to live there for their lifetimes.

General Access

The whole scheme, including all entrances must be remodelled to wheelchair-user standards.

Access for ambulances and passenger transport vehicles should be improved.

Legibility of the entrance (internal and external) should be improved.

Internal Finishes

Finishes to improve the legibility and aesthetic appearance of the brick clad corridors should either acknowledged the current approach of a themed street or change the themed approach entirely. For example, if the bricks and down pipes are to be retained than other finishes and fittings such as flooring, lighting, handrails, etc. should reflect an urban feel.

Communal Lounge

Sized for sensible furniture provision and wheelchair access.

Internet access should be provided in the communal area.

Kitchen to Communal Lounge

Facility adjacent to communal lounge with sink, worktop, cupboards, cooker and fridge.

Communal Toilet – Disabled standard

Positioned near to communal lounge.

Laundry Facility

It is envisaged that not all of the kitchens may facilitate the provision/siting of a washing machine. The scheme is to have a centrally located wheelchair accessible laundry facility with auto washing machines, dryer, sink, worktop, bench, ventilation, provision for ironing station.

Assisted Bathing

A stand alone assist bathroom should not be re-provided.

Guest Room

A guest room should not be re-provided.

Lift

Lift provision to be near the main entrance foyer.

Wardens Office

Wardens office to be situated near to the main entrance and may be partially glazed to overlook the entrance to the scheme which will enhance the security of the building. The office must be secure.

Ex Wardens House

This can be absorbed into the sheltered accommodation.

Mobility Vehicle Store

Contractor to provide a suitable mobility vehicle store capable of storing and recharging the vehicles, situated at ground floor level, safe and secure and accessible by service users.

Wheelchair-user standard units

The bidder is to provide 3 no. two bedroom designated wheelchair-user standard flats to the ground floor Ingram Court. The unit is to be self contained designed for independent living of physically disabled people and wheelchair -users

The following criteria are to be met:

Access: both inside and outside the flat is to comply with the Wheelchair housing design guide and particularly where the flats may have access to the inner courtyard.

Living room and dining area: To be designed in line with Standards and Quality in Development 2008 for furniture and manoeuvrability.

Bedroom: The position of main bedroom is to have the ability to have direct access to the bathroom to facilitate the provision of a tracking hoist to access the facilities.

Kitchens: The flat kitchens are designed to wheelchair standards with height adjustable kitchen units including built in oven and hob and serviced spaces for 3 appliances.

Bathrooms: The flats bathrooms are to be designed to have walk-in showers, WC and basin, with the facility to have a bath fitted over the floor drainage position at a later date (or through the RDD process).

General Mobility Standard flats (1 or 2 bedroom flat)

The remaining 20 flats are to be designed to mobility standard:

Living room/dining area/kitchen and bedroom to be designed in line with Standards and Quality in Development 2008 for furniture and manoeuvrability.

Bathrooms: The bathrooms are to be designed to have walk-in showers with a drop down seat, WC and basin, with the facility to have a bath fitted over the floor drainage position at a later date (or through the RDD process).

External

Parking provision should be made to reflect the needs of both current and future residents. Garages can be demolished if this assists the bidders design solution.

Wheelchair accessible parking spaces are required as near to the proposed main entrance as possible.

ANNEX 6: Dwellings for Refurbishment (includes note of leaseholders)
